

Advantages of Composting

Finished compost will improve the soil of your garden, lawn and houseplants

Use 1/4" thick finished compost as a lawn topdressing

Compost will:

- maintain soil moisture
- release nutrients slowly
- reduce fertilizer requirements
- improve root growth and yields
- protect plants from insects and diseases

Use compost for:

- soil amendment
- topdressing and side-dressing
- mulching
- making potting mix
 - 1/3 finished compost
 - 1/3 soil
 - 1/3 vermiculite

Add compost to the soil when planting trees, shrubs, annuals or perennials

Dig compost directly into your garden
