KOSRAE AGRICULTURAL EXPERIMENT STATION

Kosrae Agricultural Experiment Station

Integrated: Research, Extension and Education Grants

- Pineapple micropropagation and commercial cultivation to enhance productivity in Micronesia
- Black pepper micropropagation for elite seedling production: comparison of local practices and commercial cultivation methods
- In vitro selection and ex vitro evaluation for salt tolerance in cassava

- In vitro selection for salt tolerance in sweet potato
- In vitro selection for salt tolerance in taro
- Assessment of in vivo and in vitro grafting for rapid production of elite grafted lime seedlings
- Multiplication of staple food crops through micropropagation and in vitro germplasm conservation

Professional Development and Education Grants

- Micropropagation, distribution, and training for adoption of sweet potato cultivation and consumption

- On-farm implementation and demonstration of integrated sustainable agriculture and livestock production systems for small-scale farmers in Micronesia

International Grants

- Impact of climate change on food security -Pacific adaptation strategy assistance program
- Propagate and supply tissue cultured plantlets of disease resistant banana varieties
- Regional food security and sufficiency project
